Subject: Application for 2026 Summer Analyst – Engineering Role

Dear Team,

I am a pre-final year student of B.Tech in Chemical Engineering at MNNIT Allahabad and am writing to convey my interest in the 2026 Summer Analyst – Engineering position at Goldman Sachs.

With experience building production-ready applications at Nostavia Health and Avicen AI, I've worked across full-stack systems using Next.js, Node.js, MongoDB, and Azure, integrating services like Gemini and Graph APIs. My projects—including LegalAI and Chanet—showcase my focus on scalable architecture, NLP, and AI-enhanced workflows.

I achieved an All India Rank of 517 in the Goldman Sachs India Hackathon (CS Track) in May 2025, affirming my algorithmic expertise, systems thinking, and high-pressure performance—essential qualities that make me a great fit for engineering positions.

My passion for Goldman Sachs' drive towards innovation and impactful systems makes me thrilled about joining your team. I look forward to contributing and developing my skills in such a vibrant tech-centric ecosystem.

Thank you for your consideration and time.Best regards,
Vatsal Kumar
